

Ministry of Water,
Sanitation and Irrigation

WAY FORWARD / MAIN TAKE AWAY FROM THE WEBINAR ON:

Pathways to sustainability for water and sanitation services in the new normal

Webinar, Thursday 3rd September 2020

10.00 am – 12.00 noon

Main Take Away Points

1. Embracing one-health approach to water and sanitation and health during the recovery phase: In order, to enhance collaboration between water and health sector there is need to deepen one-health approach.
2. For the growth and adaptability of the sector there is need to rethink the current business model and embrace a model that would promote sustainability such as clustering and consolidation
3. To respond to the evolving operating environment, there is need to review existing WSS and WRM regulations and guidelines
4. There is need to enhance better coordination of all sector stakeholders at National and County level. To drive efficiency and value for money in the sector, there is also need to strengthen existing sector coordination framework
5. To promote operational efficiency and adapt to effects of climate change, water sector should embrace new and appropriate technology along the water value chain
